

## Who is Venn Diagnostics?

With over 30 years of experience and patented countrywide GIS database, Venn is the established market leader in the field of municipal utility management. We have years of tariffs, policies and consumption statistics that make us the only company in South Africa that can comprehensively audit, manage and library every aspect of your municipal utilities.

### Our Credentials

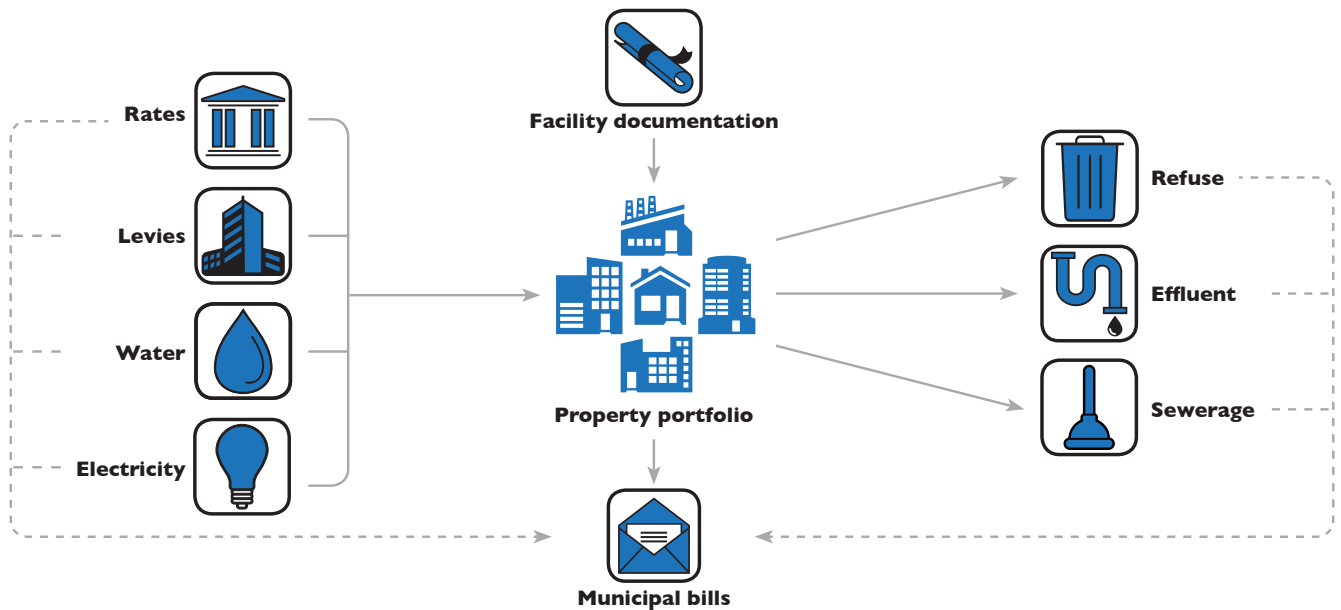

30 years of experience  
4 000 clients  
80 000 properties  
300 000 utility accounts  
R500 million recovered  
BBBEE level 4  
Countrywide Coverage

## What Venn Diagnostics will do for you

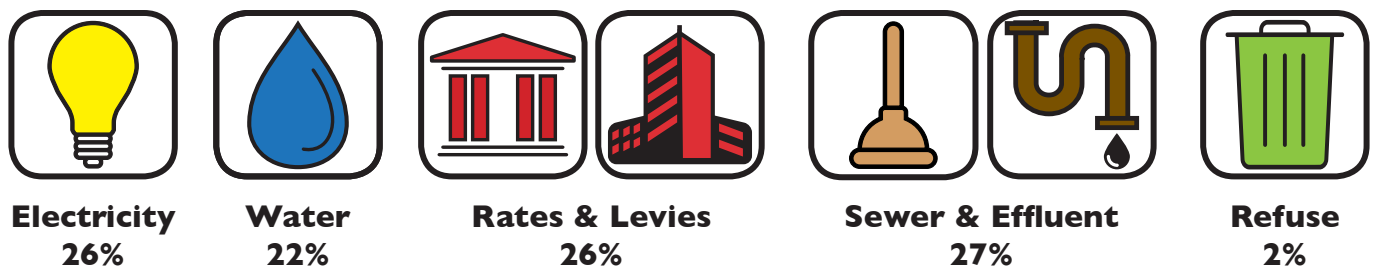

- Investigate all municipal overcharges, unusual consumption volumes and charge options.
- Optimize your charge parameters to achieve cost reductions – increasing your bottom line.
- You receive a comprehensive report, quantifying benefits and detailing actions required.
- Secure full repayment of overcharges, impermissible charges, and maximize applicable rebates.
- Handle all municipal liaison, from application to implementation – quickly, correctly and fully.
- Keep you completely up to speed with project progress and achievements.
- Provide access to your facility info, municipal bills and usage data – online and on mobile.
- Use our legal, technical and valuation expertise to minimize your utility charges.

**We believe you should spend time focusing on your core business – not dealing with municipal call centres. With Venn Diagnostics, sorting out your municipal bills has never been easier.**

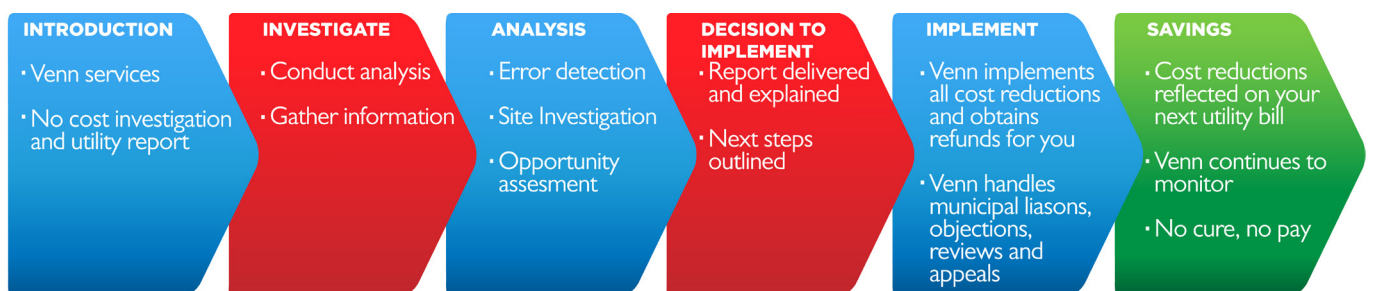

## Venn investigates and implements, you save

## Venn finds savings on ALL municipal costs

## The Venn Diagnostics process

**Venn offers a no-cost utility report on a contingency basis. “No cure, no pay” means that if you don’t save with our service, there is no fee.**
